# SEAN SULLIVAN

FULL-STACK DEVELOPER

## PROFESSIONAL SUMMARY

Web developer with 8 years of experience building software in both large teams and small startups. Skilled in problem-solving, adaptable to different technologies, and creative in finding innovative solutions. Passionate about product development, learning new technologies and aspiring for a career in Engineering Management.

## EMPLOYMENT HISTORY

SEP, 2022 - AUG, 2023

### Front-End Engineer, FortRobotics

Web developer responsible for building out a UI component library in React, Typescript, and Tailwind, as well as a hybrid mobile app in React, Typescript, and Capacitor. Other responsibilities included:

- Presenting demos
- Leading standups
- Conducting code reviews
- Creating new user stories
- Writing unit tests
- Participating in design reviews

NOV, 2020 - SEP, 2022

### Front-End Engineer, TableNeeds

Web developer responsible for assisting the engineering team in building out a consumer app and POS system for the restaurant industry. Used React, Typescript, GraphQL, Ionic, and Capacitor. Designs and demos using Figma and Storybook. Other responsibilities included:

- Conducting code reviews
- Pair programming
- Writing end-to-end tests
- Working with 3rd party contractors
- Participating in design reviews
- Collaborating with the UX/UI team to create user-friendly and visually appealing interfaces for the consumer app and POS system

FEB, 2020 - NOV, 2020

### Web Consultant, RuralSourcing

Web developer responsible for working on client projects. Worked on a large business-facing app using React, Typescript, and ASP.NET MVC. Worked with RSI team to develop a new UI. Other responsibilities included:

- Mentoring junior developer
- Presenting demos
- Conducting code reviews
- Pair programming
- Collaborating with clients to understand their needs and provide effective solutions.

APR, 2019 - FEB, 2020

### Junior Engineer, Nexercise, Inc

Responsible for working with the engineering team on the Sworkit app using Ionic, Typescript, and Stencil. Spent time debugging user-reported issues, creating issues in Github, pushing minor fixes to the app.

- Responsible for working on client projects. Built web applications using React/GraphQL, Ruby on Rails, Angular, and Ionic. Other responsibilities included:
  - Working with third-party contractors on graphic design
  - Meeting with clients directly to present status updates and go over their wants/needs for new functionality
- Collaborating with other engineers to continuously improve the Sworkit app and enhance user experience

JUL, 2017 - APR, 2019

### Web Application Developer, BearfaceMedia

Responsible for working on client projects. Built web applications using React/GraphQL, Ruby on Rails, Angular, and Ionic. Other responsibilities included:

- Working with third-party contractors on graphic design
- Meeting with clients directly to present status updates and go over their wants/needs for new functionality
